INTERNSHIPS

MERN stack

NextGen Edunet Foundation

- Developed a full-stack Food Delivery Application with secure authentication, dynamic UI, and RESTful APIs.
- Optimized application performance and implemented user-centric design principles.
- Enhanced proficiency in Java, Python, JavaScript, SQL, and frameworks like ReactJS and Django.

PROJECTS

NASA Astronomy Picture of the day

- Built a Python application integrating NASA's APOD API to fetch and display daily space images with descriptions.
- Demonstrated API integration, data parsing, and creation of an intuitive user interface.

A Smart AI Based Solution for Traffic Management

- Designed a real-time traffic control solution using YOLO-v3 and custom CNN for vehicle detection.
- Implemented dynamic signal adjustments to reduce congestion and emissions, showcasing computer vision and AI expertise.

CERTIFICATES

- Python Certification.
- Data Analytics Certification.
- Prompt Engineering by IBM.
- Certified as an Oracle Foundations Associate .
